

LexisNexis Univentio, part of the Reed Elsevier group, is a leading, globally orientated company focusing on providing software, systems and content for online intellectual property (IP) research, based on latest technologies. LexisNexis Univentio currently owns the largest global commercial and electronically accessible collection of patent information. From our facility in Rijnsburg (greater Leiden region), The Netherlands, we consolidate IP content from a variety of sources globally and produce a unique, value-added data set that our clients can access through numerous means for internal processing. LexisNexis Univentio furthermore operates as global intellectual property centre of excellence for the group. In support of our organization we are currently searching a

## **IP Training Consultant**

### **Key accountabilities and responsibilities**

As a Patent Information Specialist you will give technical support to both the IP Sales representatives and the Total Patent Product manager. You will train (potential) customers and will be responsible for developing these trainings yourself.

Knowing all the ins and outs of our IP products and customers you will have full insight in the training needs. The IP Training Consultant identifies points of improvements in Data Content and Web Application of TotalPatent and therefore will pro-actively give feedback to the Development team and Content manager. You will of course have a commercial attitude and are willing to travel in order to visit our customers throughout the region. You will report to the COO of LexisNexis Univentio.

### **Key skills**

- Minimum Bachelor degree, Post HBO course Patent Information Specialist is a pro;
- Thorough knowledge of patent data of all Patent Authorities (e.g. Patent Kinds;
- Classification systems (IPC, ECLA, US Class, FI Class, F-Terms), Patent numbering systems and formats, Patent Families, Citations, Legal status);
- Familiar with Patent Searches in general;
- Able to work with free Web Patent Search Applications (at least Espacenet, USPTO databases and Depatisnet);
- Knowledge of commercial Web Patent Search Applications (preferably Delphion, PatBase MicroPatent and Questel);
- Acquainted with general Patent Application process;
- Knowledge of XML Standard 36;
- Didactical skills (development of training programs and training of customers);
- Able to write functional specifications;
- Excellent English language skills (speaking and writing) and good German (speaking) language skills;
- Knowledge of Optical Character Recognition processes and Machine translation processes is an advantage.

### **LexisNexis Univentio offers**

- Market conform employment terms;
- Involvement in complex global projects;
- Informal working environment;
- A small and dynamic organization where you can make a change.

**To apply or for further information**

Questions concerning this role can be asked to Andrew Rufener, COO.
