

Corporate Patents (22 professionals, HQ Venlo) is worldwide responsible for the examination, documentation and protection of Océ's intellectual property, unique technologies, products, applications and design. Currently we are looking for a

Patent Information Specialist

Your role and responsibilities

You spot trends in relevant technologies to extend Océ's knowledge base. Therefore, you explore and analyze patent related literature: on your own initiative or on request of Patent Attorneys or other stakeholders. Close contacts with R&D-colleagues are part of the job. By monitoring patent documents, you support informed decisions when choosing strategies for the research & development of new products. You will have great flexibility in the planning of your own work. Sometimes you have to dig deep, other times you have to take action on unplanned developments. You will report to the Patent Attorneys and VP Corporate Patents

Who are we looking for?

You have a Bachelor's or Master's degree in preferably Physics or Mechanical Engineering. Working experience in a professional research & development environment is an advantage. Obtaining the diploma

"Patent Information Specialist" is a must, but also a great opportunity for your personal development.

You have an excellent command in English. If you have a broad technical interest and consider yourself as analytical, self-dependent, persistent and strong communicator, you might be our ideal candidate.

What do we have to offer?

As technologies are rapidly changing, we offer you a challenging job in a high-tech environment and the opportunity to further broaden and deepen your technical knowledge. It is understood that Océ has excellent compensations.

Interested?

For more information, please contact: Mr. Jan Kampinga, Patent Information Specialist, tel. +31 (0)77 - 359 3397.

Océ: innovative by nature

Professionals everywhere look to Océ for digital printing and document management. Many of the world's Fortune 500 companies and leading commercial printers are Océ customers. Océ is active in the entire value chain of printing systems: from development via manufacturing, sales and service to the provision of business services and financing. In a number of countries and market segments where Océ itself does not have a sufficiently large presence, part of the product range is made available via specialized distributors. Through its own Research & Development Océ develops its own basic technologies and the majority of its product concepts. Océ is commercially active in around 100 countries and has its own sales and services organization in more than 30 of these countries. The company has about 22.000 employees.
